

# REPUBLICANS PUT TAX ON EDUCATION, UNDERWOOD SAYS

Democratic Senate Leader Scores Plan to Exploit America.

BUILDING UP GREAT WALL AROUND NATION

HITCHCOCK JOINS ATTACK Nebraska Points Out Domestic Manufacturers Dominate Home Market.

[By Associated Press.]

WASHINGTON, May 13.—Republican opponents of the pending tariff bill were charged today in the Senate by Senator Underwood, of Alabama, the Democratic leader, with "penalizing the American people in their efforts to secure knowledge, education and the advantages that grow out of educational development."

"He was discussing a 5 per cent increase in the present duty of 15 per cent ad valorem on ink which the Senate approved."

Raising Tax on Knowledge.

"In this bill," Senator Underwood said, "the majority are raising the taxes on paper of all kinds; they are raising the tax on printers' ink. They are raising the tax on everything that goes to make a book or a newspaper. It may be said that it is only a cent or two, that it is only a small amount, but when the tax is increased on every item in a bill which covers 4,000 articles, a burden of taxation is imposed to a point where men of moderate means in the United States are deprived of the advantages of life which they are entitled to have because prohibitive taxes are levied at the Custom House for the benefit of special interests that are already prospering and growing rich."

Plan to Build Great Tariff Wall.

"It seems that those who believe in a protective tariff now have reached the point where they demand a prohibitive tariff and so far as they are able they propose to build up a tariff wall so high that no importations can come in and the American manufacturer may hide behind the tariff wall and exploit the American people to his heart's desire."

Senator Hitchcock, Democrat, Nebraska, offered an amendment to confirm the Underwood rate, but it was rejected, 21 to 15.

Presenting official figures to show that American ink manufacturers not only dominated the home market, but exported large quantities of ink, the Nebraska Senator declared that the proposed tariff was "typical of the excesses in the bill." He asserted that an increase in the ink traffic at this time could not possibly serve any purpose of protection, adding that if protection were needed, it was already provided for in the existing law.

Enables Makers to Put Up Price.

"All that increasing the rate will do," he said, "will be to give a license and an opportunity to the ink manufacturers of the United States to increase their prices without any hope of competition from abroad to save the consumers."

Senator Smoot, of Utah, ranking Republican on the Finance Committee, defended the 5 per cent increase, saying it was necessary because protection was made in the bill for the increasing the protection on the ingredients of ink. He gave it his opinion that the increase would not be borne by the ultimate consumer, but probably would be taken care of by local competition.
